Results used by the tester when filling cells	
OK	Everything works fine.
Enhancement	Design, navigation, functional proposals and advice.
Minor	Design, navigation, functional proposals and advice. This Defect is not obligatory to be fixed.
Average	Design error. Functional error that rarely occurs.
Major	Functional error which is not very important. Function behaviour does not correspond to the Use Case completely (for example fields max length, etc). This defect does not influence greatly on the user's work.
Critical	Functional error which disturbs normal work of an application, but the error does not block the work of this part of application completely.
Not available	Function is not available for test.
Not implemented	Function has been not implemented yet.
Not tested	Function has not been tested.
Blocked	Function is blocked by existing critical defect

General		
Device specific tests		
Check input methods (keyboard)		
Connection		
Check the app using Edge		
Check the app using 3G		
Check the app using Wi-Fi		
Check the app work in Airplane mode		
Check app work when Bluetooth is on/off		
Messaging&calls		
Sending or receiving SMS and/or MMS		
Handling telephone call when application is in use		
Interruptions		
Check the app works correctly after switching to another app		
Check the app resuming after screen-locking mode		
User interface		
Make sure that the app reacts correctly on common gestures		
Check that application GUI corresponds the iOS HIG & Android Design		
Check that the icon and the name of application correspond to mockup		
Check touch screen responsiveness to User gestures		
Application and device settings		
Check app's profile in the device settings		
Check turning on/off notifications for the application		
Check the changing of language on the device		
Check the changing of region on the device		
Stability
